

Example: Linking for Mitosis

- **Concept 1: Mitosis** → Picture **two toes in ribbons** dancing together.
- **Concept 2: Cell Division** → The toes start solving a **long division sum**.
- **Concept 3: Cell Damage** → The sum transforms into a **nurse in uniform** who loses control on a skateboard.
- **Concept 4: Identical Replication** → The nurse crashes into a **mirror**, creating a **perfect reflection**.

By visualising this crazy sequence, you create a strong mental pathway to recall the key points about mitosis!

Worksheet: Create Your Own Links!

Step 1: Identify the Key Concepts

List four key ideas you need to remember:

1. _____
2. _____
3. _____
4. _____

Step 2: Create Your Personal Visual Links

Think of a wild, memorable image to connect each idea:

Concept 1 → Mental Image:

Concept 2 → Mental Image:

Concept 3 → Mental Image:

Concept 4 → Mental Image:

Step 3: Link Them in a Story

Write a short, crazy story linking your images together:
